

Adhish Acharya

Alexandria, VA | adhishacharya@gmail.com | 225-505-2508 | U.S. Citizen | [Portfolio Website](#)

Education

George Mason University, Master of Science in Computer Science	August 2022 - August 2025
Illinois Institute of Technology, Bachelor of Science in Computer Science	August 2018 – May 2021

Technologies

Languages: Java, Python, C, SQL, JavaScript, Angular, Haskell, TypeScript

Software: Amazon Web Services, Git, Docker, Postman, PostgreSQL, Flask, Spring Boot, PyTorch, Asana

Platforms: Eclipse, Visual Studio Code, PyCharm, Jupyter, Android Studio, Unity

Experience

Cloud Associate Engineer, Amazon Web Services – Herndon, VA	August 2021–April 2022
---	------------------------

- Diagnosed and resolved technical issues within the AWS relational database team by applying advanced troubleshooting and problem solving techniques
- Collaborated with the engineering team to provide a root cause analysis of service related issues and supported them with critical feature launches
- Replicated customer production environments using AWS services such as RDS, EC2, and CloudWatch to perform root cause analysis and resolve 100+ database-related incidents
- Provided hands-on support for relational databases including MySQL, SQL Server, and MariaDB

Team Leader-Interprofessional Project, Illinois Tech– Chicago, IL	January 2020-May 2020
---	-----------------------

- Led a team create an innovative solution to boost productivity for commuting college students
- Developed a prototype keyboard glove that enables users to input text directly from the glove, eliminating the need to use a handheld device during crowded commutes
- Utilized an agile methodology approach to organize tasks and meet project milestones

Undergraduate Researcher, University of Maryland – College Park, MD	August 2016-August 2017
---	-------------------------

- Created prototype apps for museum visitors at the Phillips Collection Museum in Washington D.C
- Gained experience with augmented reality technologies, mobile application development, and data information architecture
- Developed a mobile app using Google Maps API to retrieve the current location of the user and track their movements with polylines
- Leveraged computer vision and cloud technologies to build an interactive app where users enter an augmented reality setting to view and write comments on detected paintings

Certificates/Achievements

- Dean's List (Fall 2018, Fall 2020)
- J.P Morgan Software Engineering Virtual Experience 2020 Participant

Projects

Flashcard Application	July 2025-July 2025
-----------------------	---------------------

- Created a web application using JavaScript and HTML that students can use to create their own deck of cards to study terms and definitions. The working demo can be found on my portfolio website.

Campus Survey Form	June 2024-July 2024
--------------------	---------------------

- Developed a full stack web app for students to provide feedback on campus visits. Angular and Spring Boot platform was used for the application

Study Spot Reserve App	March 2021- May 2021
------------------------	----------------------

- Created a web application via Python and Flask that allows users to reserve study spots on college campus
