

Adhish Acharya

Alexandria, VA | adhishacharya@gmail.com | 225-505-2508 | U.S. Citizen | [Personal Portfolio](#)

Education

George Mason University, Master of Science in Computer Science	August 2022 - August 2025
Illinois Institute of Technology, Bachelor of Science in Computer Science	August 2018 – May 2021

Technologies

Languages: Java, Python, C, SQL, JavaScript, Angular, Haskell, TypeScript

Software: Amazon Web Services, Git, Docker, Postman, PostgreSQL, Flask, Spring Boot, PyTorch, Asana

Platforms: Eclipse, Visual Studio Code, PyCharm, Jupyter, Android Studio, Unity

Work Experience

Cloud Support Associate, Amazon Web Services – Herndon, VA	August 2021–April 2022
--	------------------------

- Diagnosed and resolved technical issues within the AWS relational database team by applying advanced troubleshooting and problem solving techniques
- Collaborated with the engineering team to provide a root cause analysis of service related issues, reducing the number of technical cases in queue
- Replicated customer production environments using AWS services such as RDS, EC2, and CloudWatch to perform root cause analysis and resolve 100+ database-related incidents
- Supported and maintained MySQL, SQL Server, and MariaDB databases, improving performance and availability across production environments

Training and Coursework Experience

Team Leader-IPRO Academic Project Illinois Tech– Chicago, IL	January 2020-May 2020
--	-----------------------

- Led a team to create an innovative tool to boost productivity for commuting college students
- Designed and developed a prototype of a keyboard glove that enables users to input text directly from the glove, eliminating the need to use a handheld device during crowded commutes
- Applied agile methodologies using project management tools such as Asana to manage tasks and meet project milestones

Undergraduate Researcher, University of Maryland – College Park, MD	August 2016-August 2017
---	-------------------------

- Built prototype apps as part of the first year innovation research experience program to create an engaging experience for art museum visitors
- Gained experience with augmented reality technologies, mobile application development, and data information architecture
- Developed a mobile app using the Google Maps API to capture the user's current location and visualize their movement history with polylines, enhancing the museum experience
- Leveraged computer vision and cloud technologies to build an interactive app where users enter an augmented reality setting to view and write comments on detected paintings

Projects

Flashcard Application	July 2025-July 2025
-----------------------	---------------------

- Created a web application using JavaScript and HTML that students can use to create their own deck of cards to study terms and definitions. The working demo can be found on my portfolio website.
- Features include animations for next definition and the ability to remove and add cards to the deck

Campus Survey Form	June 2024-July 2024
--------------------	---------------------

- Developed a full stack web app for students to provide feedback on campus visits. Angular and Spring Boot platform was used for the application
